PixelVerse

Next generation Metaverse NFT ecosystem platform for games, communities and creators.
What is PixelVerse?

PixelVerse is a virtual world platform and toolset that lets creators and communities create their own NFTs in a next generation metaverse.

**PixelVerse**

Multi-blockchain virtual world that lets users collect, display, interact with NFTs in a shared space.

**PixelBuild**

A next generation toolset that lets creators create multi-media NFTs across different blockchains.

**PixelClout**

Verified Creators and communities get their own tokens in Pixelverse. Fans and speculators can trade and back up quality and popular creators based on their standing in the Pixelverse.

**PixelLaunch**

Launch NFT collections, land sales, hero or weapon sale as well whole projects into the growing Pixelverse ecosystem.
Virtual shared world with NFT spaces
Metaverse land designed for content creators and owners. Using a 3D space based on cartesian coordinates, the virtual land on PixelVerse will be limited in space. Users of the platform will be able to purchase spaces to do virtually anything.

Customize your avatar with NFTs
Users are able to customize their avatars, create items, and monetize their unique items through NFTs. Businesses can easily digitize their physical items to unique items to customize avatars.

Private NFT spaces
Not all users wish to experience the virtual experience with millions of users. PixelVerse allows for users to have customized, private spaces that will allow participants to enjoy with their close friends and family.
PixelBuild Tools

1. NFT Factory
2. NFT Multivendor
3. NFT Bridge
4. NFT Auction
5. Creator Pages
PixelClout lets established artists, creators and communities claim their page and tokens to provide VIP rooms or holder discounts to their NFT sales.

Social Integration
Metaverse land designed for content creators and owners. Using a 3D space based on cartesian coordinates, the virtual land on PixelVerse will be limited in space. Users of the platform will be able to purchase spaces to do virtually anything.

Personal Customization
Creators are rewarded with 10% of the creator tokens to balance control of the creator tokens. Creators are able to customize benefits of holding creator tokens such as sharing in the NFT sales revenue.

Private Experience
Not all users wish to experience the virtual experience with millions of users. PixelVerse allows for users to have customized, private spaces that will allow participants to enjoy with their close friends and family.
Creator Tokens

PixelClout’s Creator tokens are designed on a bonding curve to ensure economic fairness to the supporters.

Founders can authenticate their profiles using existing social media to mint a percentage of founders’ token.

Each transaction using the fan token has a tax that is shared to PIXEL holders and the creator.
Fanship turns into an investable asset

Creator tokens are coding agnostic on PixelVerse's platform. Any creator, company, or community can easily issue creator tokens. Now fans can convert their fanship as an investment class. PixelClout will provide the following major features that will be powered by the creator tokens.

- Prediction Games
- Special NFTs
- Marketplace
- PixelLaunch

PixelVerse uses a custom built blockchain gateway to interact with different smart contracts to allow users a cross-chain issuance of NFTs.

PixelVerse - Cross-chain compatible NFT Marketplace Architecture
We offer the industry’s lowest seller fees at 1.25% to attract more artists to our NFT marketplace. 50% of the fees will be sent to a reserve wallet to buy back and burn PIXEL tokens.
PixelLaunch

PixelLaunch allows for Metaverse-themed projects and companies to fundraise. PixelLaunch sets new standards and methods for decentralized fundraising in a billion dollar market.

PixelLaunch allows companies to either fundraise either with native tokens or digitized items through NFTs, thus allowing for immediate liquidity instead of traditional equity investments or crowdfunding.
On the PixelVerse NFT marketplace, users can purchase plots of virtual land. On this virtual land, users can have full customization of the virtual land. In addition, users having the genesis land NFTs will have additional PIXEL benefits.
Pixel Token

PIXEL token powers the PixelVerse platform economy. Users can use PIXEL for governance, payments, mining, and farming.

**Hardcap:** $1,425,000
PixelVerse has minimized the fundraiser to finance the project development to complete milestones and deliverables.

**Initial mCap:** $292,500
PixelVerse team constructed a tokenomics that maintains a low market cap to convert into a strong post-listing performance.

**Initial mCap:** $292,500

**Total Supply:** 1,000,000,000
**Token Type:** BSC, SPL
Team

Naree Kim  
CEO  
Founder of PixelVerse, Naree has been part of the content media industry for the past five+ years focusing on creating IP for games, animations, and more.

Olatunji Fash  
CMO  
Marketing manager of PixelVerse, Olatunji is a blockchain enthusiast with experience for advising and managing global marketing campaigns for various projects.

Martina Mazzitelli  
Lead Artist  
Martina has conceptualized, drawn and animated game characters and environments for the last 10 years. She is taking the lead for design of PixelVerse's 2D games.
Roadmap

Q4 2020
- Ideation
- Market Research

Q3 2021
- Token Sale & IDO
- PixelNFT Release
- PixelClout Alpha Release

Q4 2021
- NFT-based Loan Launch
- PixelBuild Alpha Launch
- Staking Dashboard Release

Q1 2022
- On-chain Voting Implementation
- PixelVerse SDK Alpha Release

Q2 2022
- PixelVerse VR Integration

Q3 2022
- PixelLaunch Release
Thank you
